

What is it ?

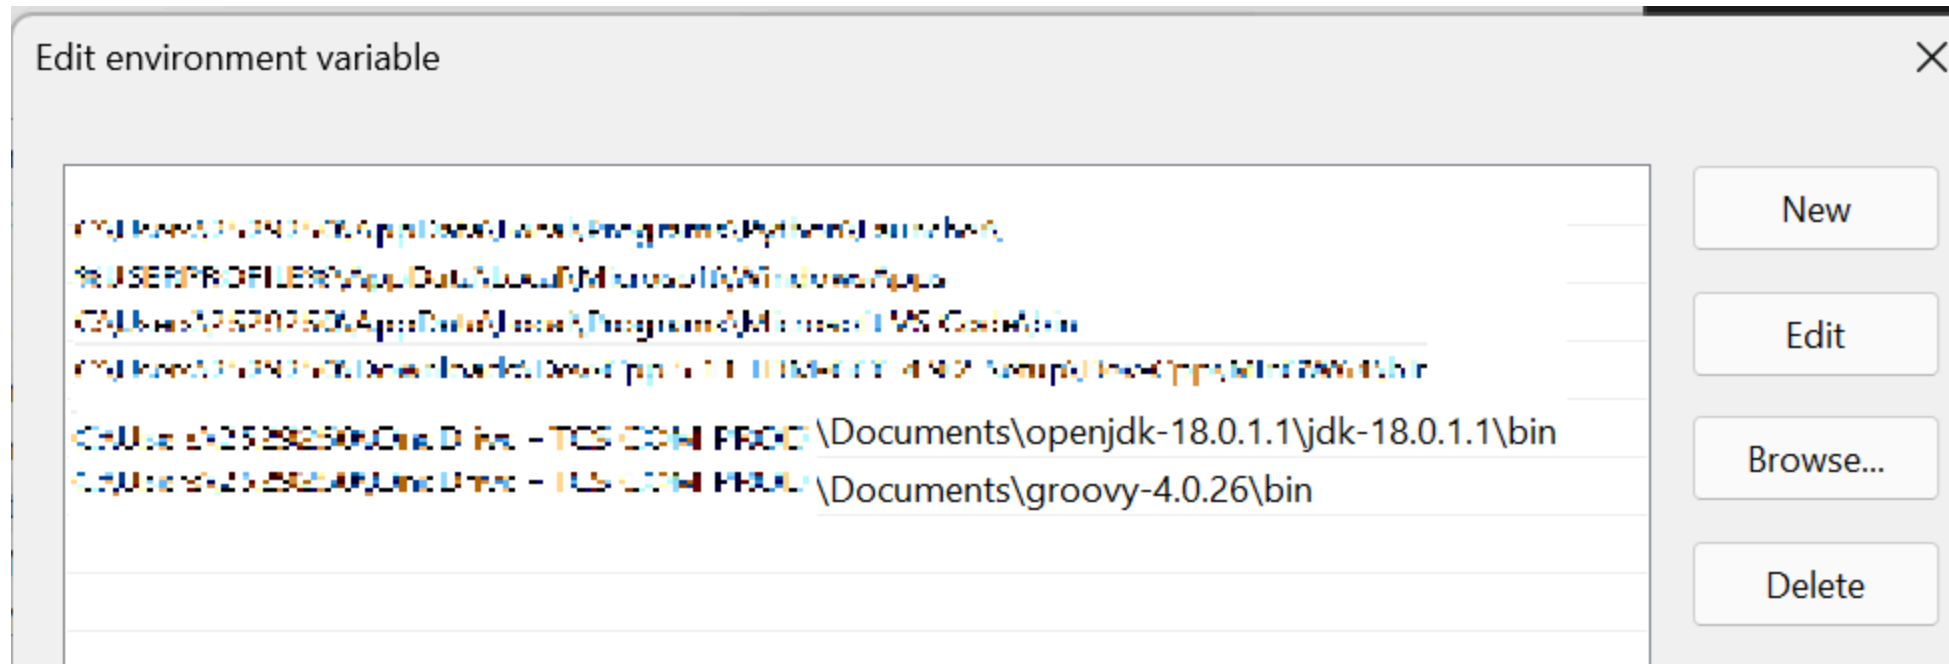

A frontend to **groovyc** that lets you compile your iworkflow/groovy code right in the browser

Architecture

Make sure groovy is added to path

also Java

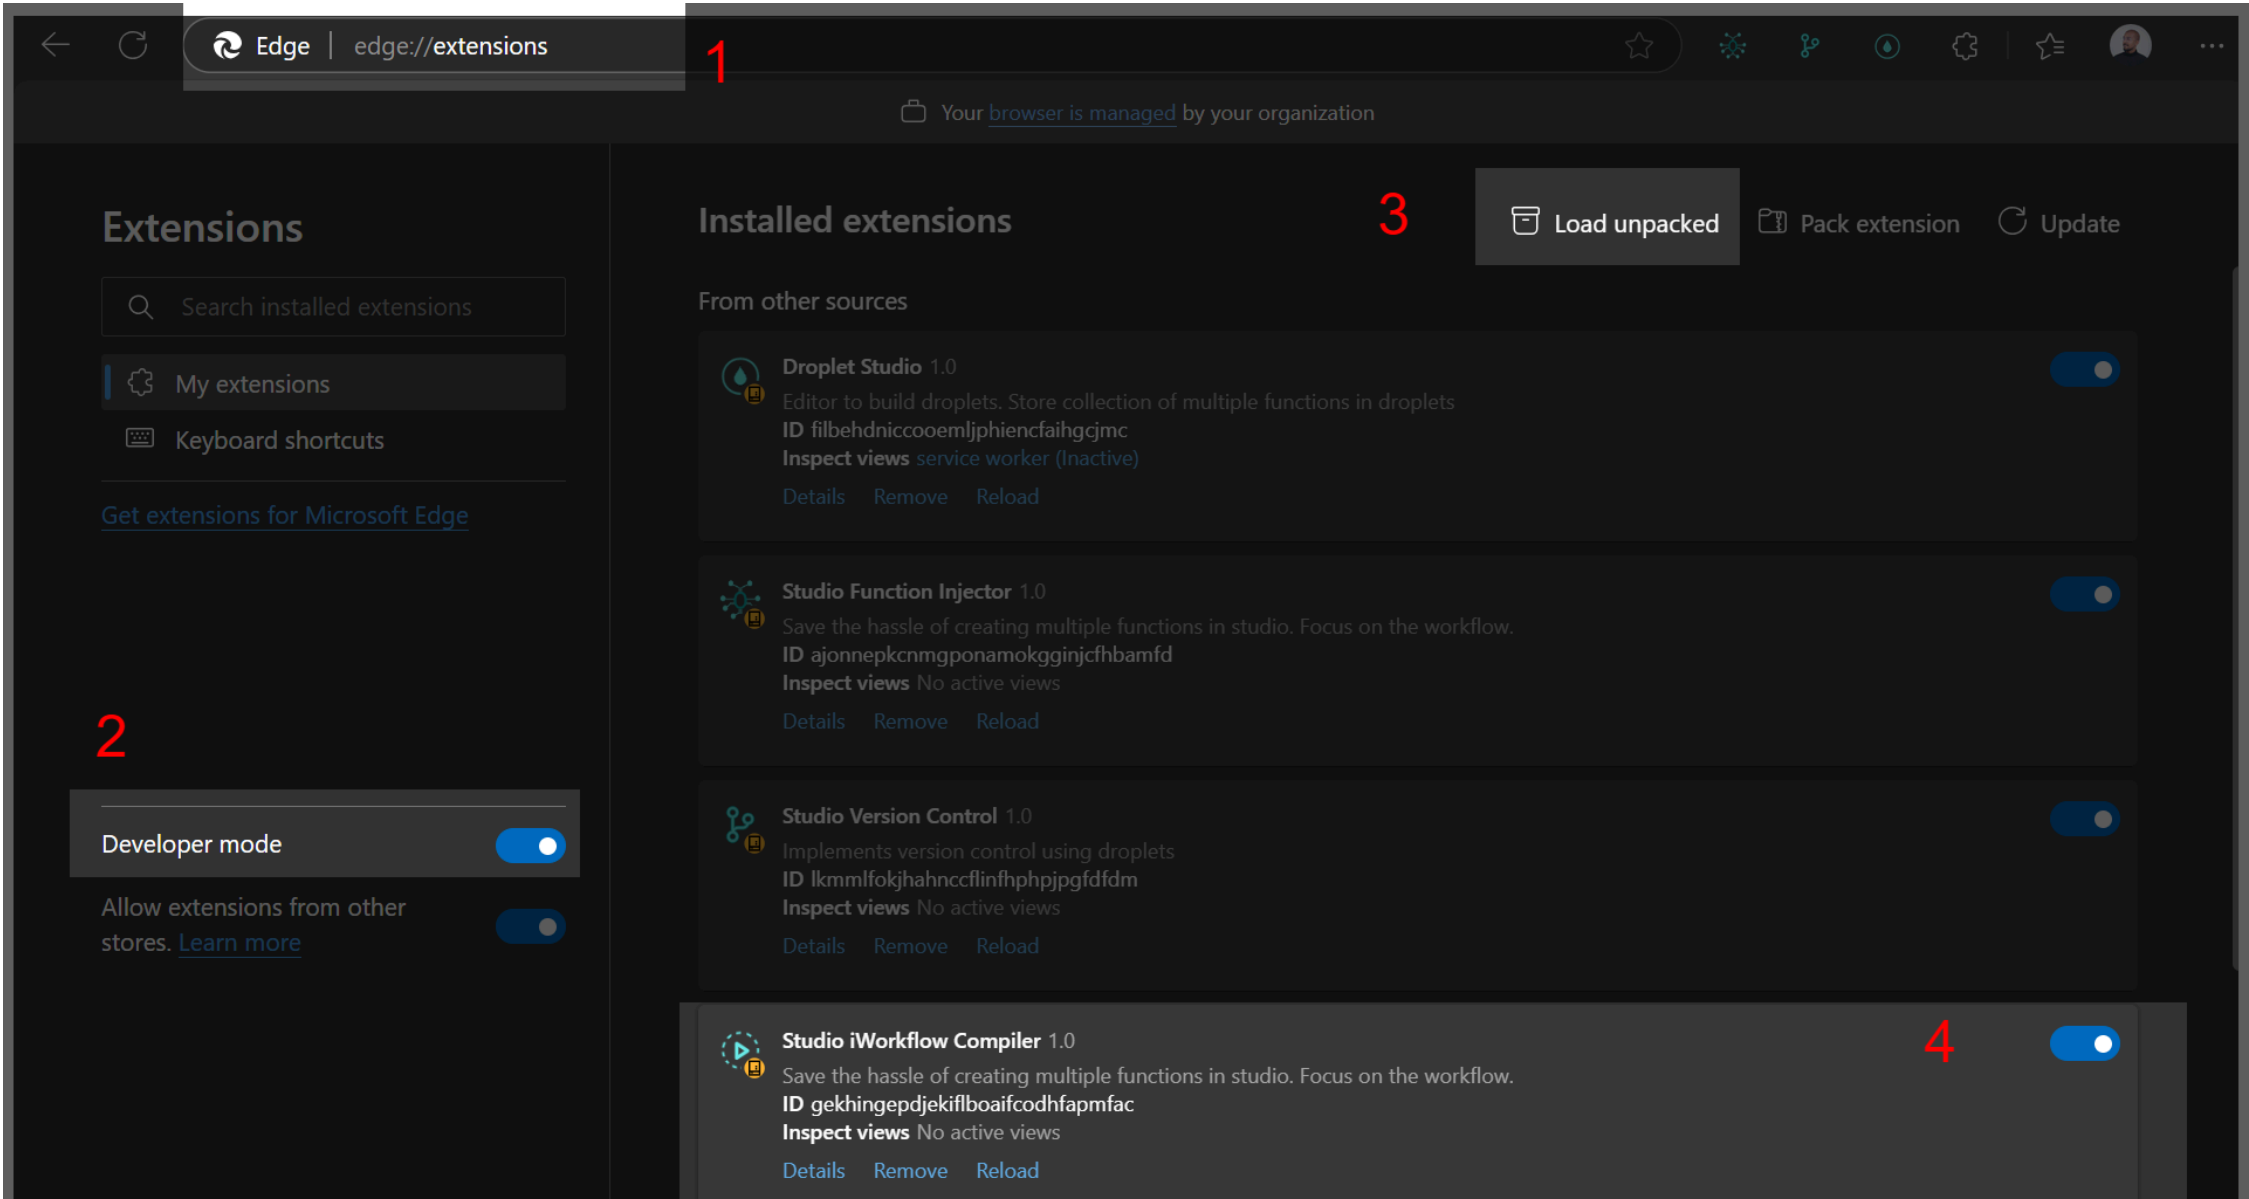

Start compiler-service

Name	Status	Date modified	Type	Size
 compiler-service.exe		5/25/2025 10:10 PM	Application	12,380 KB

```
iworkflow compiler
Local compiler service for studio - joel.eldo@tcs.com
Agent is running on port http://localhost:8003/
|
```

Load unpacked extension

Navigate to any groovy/iworkflow function in studio

```
public getCUOSPwd() {
```
